EDUCATION

Pace University.

Master of Science in Computer Science. G.P.A: 3.84 / 4

New York, USA

August 2024 - May 2026

Theem College of Engineering.

Bachelor in Mechanical Engineering. GPA: 8.62 / 10

Maharashtra, India

August 2018 - May 2022

Technical Skills

- **Programming Languages:** Python, Java, C, C++.
- **Web Technologies:** React, Node.js, Express, MongoDB, HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Tailwind, Oracle 21c, SQL, RestAPI, FastAPI, Flask, Jinja, MySQL, Vercel.
- **Version Control and management / UI UX:** Git and GitHub, Jira / Figma and Framer.
- **Tools & Technologies:** Postman(API testing), Docker(Container), MongoDB Compass & Atlas, Word, Excel, PowerPoint.

Experience

Web Developer | Super Auto Equipment Services ,India

(September 2023-July 2024)

- Built a custom business management system using MongoDB for data storage, Express.js and Node.js for backend APIs, and React.js for the frontend, increasing operational efficiency by ~50% and reducing manual work by ~70%.
- Collaborated with cross-functional teams to design and deploy a responsive, role-based React.js interface and scalable backend services using Node.js and Express.js, aligning the solution with business goals.
- Streamlined operations and improved team productivity by managing multiple business workflows simultaneously, enabling faster task completion and measurable improvements in client satisfaction.

Quality Supervisor | Raychem RPG Pvt Ltd, India

(July 2022 – September 2023)

- Led a team of 7 inspectors, maintaining 90%+ quality compliance and reducing product defects by 20%.
- Conducted audits and cross-functional process improvements to ensure timely delivery, quality assurance, and improved client satisfaction.

PROJECTS

PharmaXpert | [GitHub link](#)

(May 2024 – June 2024)

- Built a full-stack MERN pharmacy management system using React.js, Node.js, and HTML/CSS, automating core workflows and reducing manual operational effort by ~60%.
- Implemented inventory and prescription management modules using Node.js, JavaScript, and MongoDB, enabling real-time tracking of medications and improving processing efficiency while reducing stockouts.
- Developed sales tracking, reporting, and secure authentication features using Node.js and MongoDB, supporting over 5,000 transactions and improving financial visibility.

Adaptus - Adaptive Learning Assistant | 1st Runner-Up | Pace University × MemVerge Hackathon | [GitHub](#) (November 2025)

- Built an adaptive Personalized AI Study platform using Python FastAPI and a modular architecture, dynamically selecting the most suitable LLM from 3 providers (OpenAI, Anthropic, Google) to deliver personalized lessons.
- Developed a persistent learner memory system using MemMachine, integrated with RESTful APIs, CORS configuration, and a lightweight HTML/CSS/JavaScript frontend for interactive lesson delivery and real-time feedback.
- Increased lesson relevance across repeat sessions by ~40% and reduced LLM experimentation time through modular backend design, enabling faster testing and deployment of new providers.

Momentify | [GitHub Link](#)

(December 2025)

- Developed *Momentify*, a full-stack MERN application to store personal memories with titles, descriptions, friends met, and up to 10 images per entry, using Cloudinary for scalable image storage.
- Built 8+ RESTful APIs with Node.js and Express and MongoDB to manage memory data and image URLs, achieving 100% separation of images from the database and improved performance.

Certification | Volunteer Experience

- **Amazon Web Services** – Cloud Practitioner and Solution Architect -Pursuing
- **Google DevFest NYC** | Volunteer Google office, Pier 57, New York, USA | November 2025
